

wavetec

MaEasy

wavetec suspension device

For a quick and easy fixing of Speed Displays:

- Device for fast assembly of a speed display:
2 plates are hung one into another
- Simple one-man assembly
- for masts with a diameter of 60 to 300 mm
- designed for wavetec systems
- but also suitable for commercial clip systems
- The inclination of the sign is adjustable
- protected by lock against disassembly
- Material: aluminium, 3 mm

Application

Install your speed display with the suspension device MaEasy. Hanging up and removing of the Speed Display is very simple.

MaEasy is particularly suitable, if you want to change the location of the speed display frequently.

One person alone can hang up and remove a sign very simply.

Simple assembly

- Connect one plate firmly with the mast
- Connect the second plate with the speed display
- Hang up the Speed Display at the location comfortably.
- If you have already equipped several masts at different locations with a MaEasy-plate, fastening of the speed display is very simple - for different locations you can order the necessary additionally plates.
- If you unscrew the thumbscrews, you can bend over the speed display up to 15°.
- Protect the speed display with the lock against unauthorized removing.
