

wavetec

# MaPat

## wavetec suspension device for a quick fixing

- Use it with wavetec Speed Display and Counter
- Qualified for masts with a diameter up to 300 mm
- Angle of inclination is adjustable
- lockable
- zink-plated steel, aluminium and stainless steel

## Application

With our suspension device you get the possibility to hang on and take off your Speed Display or Counter in a very easy way:

Two travers girders are locked with clasps.

At the backside of each Display or Counter are 4 fastened screws, so that the Display or Counter could be easily put into the suspension device..

It's very useful, when you oftenly change the point of use.

Mapat is lockable.
