

wavetec

# TriMa

## wavetec mobile tripod

- Tripod, height: up to 2,10 m
- Telescopic tube to adjust the height
- Aluminium construction, foldable
- For free standing
- Attractive price

### Application

You can use this tripod for the mobile setting of the Speed Display. It is lightweight (only 3,5 kg) but very stable and it is standing safe on the ground. You can use the telescopic tube to adjust the individual height for your Speed Display. It is safe due to a splint-pin on the main tube.

### Features

- Very easy to build up
- Light and small
- Can be build up on craggy ground as well
- Adjustable with telescopic tube
- No additional tools needed

### Technical Overview

Tripod	Telescopic construction
Max. load	18 kg
Minimum height	1,4 m
Maximum height	2,1 m
Total lift	0,7 m
Material	Aluminium, black coated

#### Attention:

For easy mounting of your display speed on tripod mast, we recommend our stainless steel mounting brackets.

optional: special bracket for TriMa, stainless steel,
